CLASSIC QUALITY MODERN EFFICIENCY

Investing in a St. Croix stove means investing in the confidence of a hardworking product that was built to last.

The St. Croix seal pledges genuine craftsmanship behind every St. Croix product we build.

For most people, heating a home is a job for utility companies. But you're not like most people—you know there's value in self-sufficiency. To get a job done right, sometimes you have to do it yourself.

Our stoves are built for attitudes like yours. They're built for your garage, your basement, your living room—they're built as heating alternatives to supplement your furnace. Because it's not about taking the easy way out. It's about having a stove that works as hard as you do.

So on those cold winter days, you won't have to count on anyone else to stay warm. Heating your home will be in your hands. And we know you wouldn't have it any other way.

ELEMENT-P

A small stove that delivers big heat when you need it

Perfect for tight spots, corners or smaller rooms and cabins that still call for ample warmth, the Element stove steps up to the challenge with big heating performance. Equipped with electronic ignition and a generous-for-its-size 45-pound hopper, it delivers all the features and reliability of a genuine St. Croix stove in a more compact footprint.

ACCENTS AVAILABLE IN TWO OTHER CUSTOM FINISHES

ECLIPSE-P

A contemporary stove that delivers serious heat

When your space demands serious heat, demand a stove that can deliver. With a massive BTU output and largest-in-class room air fan, the Eclipse stove makes short work of heating your home. The Eclipse combines the powerful performance you need with smart, durable St. Croix design.

ALSO AVAILABLE IN A MULTI-FUEL CAPABLE OPTION THAT BURNS CORN, WHEAT, RYE, CHERRY PITS AND DISTILLERS GRAIN PELLETS

Shown with Matte Black Accents

ASHBY-P

A pellet insert designed to rededicate your space to warmth

Built to replace your current source of woodburning heat, the Ashby insert offers all the benefits of a standard wood pellet stove while fitting into your existing fireplace profile. With easy-cleaning features and a wall-mount thermostat, you're able to efficiently control the fire—leaving you with a heating source that's both conventional and contemporary.

PRESCOTT

A tailored, traditional stove built to burn long and strong

The straightforward thinking behind this stove's design is as reassuring as its classic aesthetic. A large 75-pound hopper means you'll spend less time refueling. And with the option of a pedestal or decorative accent legs, you can customize your stove to fit any space. Convenience paired with solid construction—that's the Prescott advantage.

HASTINGS

A cast iron, arched-door stove with a flair for function

The sturdy design of the cast iron Hastings stove embodies St. Croix style. Evoking the feeling of an old-fashioned woodburning stove, the Hastings melds thoughtful form and quality function. A strong frame is complemented by delicate design details—like arched doors that outline a large viewing area. The result? A quality stove that's as practical as it is attractive.

Available in Matte Black

Digital Controls & SmartStat

St. Croix pellet stoves come equipped with touch pad digital controls that feature automatic lighting and relighting. The control hides out of view when it's not in use, providing a sleek look. And with the St. Croix SmartStat system, your stove will give you the convenience of hands-off temperature control.

VersaGrate Cleaning System

All pellet stoves feature the self-cleaning VersaGrate system. The grate scraper lets you easily clear away any residual ash into the convenient front ash drawer while the stove is running. That means you can burn your stove for extended periods between cleanings.

Easy to Fill Hopper

Hopper capacities on St. Croix pellet stoves range from 40 to 75 lbs., which means you can get a pellet stove that's a perfect fit for your lifestyle. All units have top-loading hoppers so you can quickly and easily add fuel to the fire.

Stainless Steel Heat Exchanger & Built-In Tube Scraper

The stainless steel heat exchanger is made of the highest-quality, corrosion-resistant metal, and the built-in tube scraper makes cleaning it quick and easy.

REFUEL  **RENEW**

St. Croix pellet stoves are designed to burn PFI premium wood pellets—providing you with a renewable, economically efficient fuel source.

DECORATIVE ACCENT LEGS

Customize your stove with optional legs, which are available for the Prescott EXL stove. Legs are available in matte black, gold plated or nickel plated finishes to match your custom accents.

DURABLE, CERAMIC GLASS

All St. Croix stoves are made with durable, ceramic glass that not only allows you a clear view of the fire, but also makes the stoves safer for your home.
